Request Form

Calibration Request Details

Please fill in your requested items and details for calibration:

Item	Product type	Serial number	Customer instrument ID	Calibration type**	Calibration scope (list currents if not standard**)	Sample report no. *
1				☐ Standard ☐ DC+ ☐ DC-		
2				☐ Standard ☐ DC+ ☐ DC-		
3				☐ Standard ☐ DC+ ☐ DC-		
4				☐ Standard ☐ DC+ ☐ DC-		
5				☐ Standard ☐ DC+ ☐ DC-		
6				☐ Standard ☐ DC+ ☐ DC-		
7				☐ Standard ☐ DC+ ☐ DC-		
8				☐ Standard ☐ DC+ ☐ DC-		
9				☐ Standard ☐ DC+ ☐ DC-		
10				☐ Standard ☐ DC+ ☐ DC-		

*To be filled in by Danisense

**Our standard dc calibration is performed at 0, ±10%, ±25%, ±40%, ±55%, ±70%, ±85%, ±100% of the transducer nominal DC current. Results are presented with and without offset, with linearity analysis and statement of conformity (for Danisense transducers only) on all test points. See sample report for details.

Sample report: We create a sample calibration report based on your request.

Terms of service: The sample report shows the details of the calibration and our terms of service.

Price and Delivery: You will receive a quotation with price and expected delivery time

Shipping calibration items to Danisense Calibration: When you accept our offer, you will receive a CRMA number for your order. Please attach this form with the CRMA number to the shipping package.

Danisense A/S

ATT: Calibration

Malervej 10, DK-2630 Taastrup, Denmark

Please E-mail the form to: calibration@danisense.com
